■ Manager commentary

Following the sharp setback in equity markets during October, we increased the allocation to developed market equities in the Portfolio by approximately 2% shortly after month end. The market environment has clearly become more challenging this year, but valuations in equities have improved significantly due to the strong growth in corporate earnings and market falls. We came into this period with a relatively cautious stance and so were able to take advantage of the buying opportunity presented to us whilst still maintaining a resilient and well-diversified Portfolio composition.
